

I am writing this letter to voice my opinion on proceeding 02-278. I believe that a federal guideline on telephone privacy, but I do have a few concerns. My main concern is that the new guidelines will override the existing Telephone Privacy Act in the state of Indiana. Since signing up I have seen a dramatic drop in the number of unsolicited phone calls. Before adding my phone number to the list I would get anywhere from 5-10 calls a day from. After signing up I rarely get a call from anyone but family and friends. In my personal opinion it is very important that any laws adopted on the federal level do not override the state law in Indiana.

Thank you,
Bradley Blake
